Unfortunately, non-compliance with the norms of international humanitarian law and impunity of violators is perceived by the general public as the inefficiency of the law itself. Of course, this is not so. Russia's Contribution to the Development of IHL. Russia has made a great contribution to the development of international humanitarian law. The report, which also contains commentaries on the principles, appears in Yearbook of the International Law Commission, 1950, vol. II, para. 97. Now Published by Springer The Yearbook of International Humanitarian Law provides a truly international forum for high-quality, peer-reviewed articles, commentaries on current developments, reports on state practice, and documentation that have international humanitarian law as their focal point. All aspects of international law applicable during international and non-international armed conflicts are covered, in addition to interesting and significant developments in related fields, such as international peace and security, international criminal law, human rights law, disarmament law and refugee law, inter alia.
